CLARK INDUSTRIAL

Tanks

Clark Industrial provides a specialised consulting service for the supply of custom-fitted industrial tanks for industrial water storage, water treatment plants, chemical storage and processing, liquid feed and liquid fertiliser storage.

Clark Industrial tanks are designed and manufactured to meet specific industrial requirements. We also offer a full range of fittings that can be fitted to the tank to your specifications at our manufacturing sites in South East Queensland, Far North Queensland and New South Wales servicing New South Wales and Victoria.

With specialist consultants whose collective experience spans decades, Clark Industrial offers a depth of expertise and strength in customer service that sets the benchmark in the industrial tank sector nationally.

CLARK TANKS

Clark Industrial's sister company, Clark Tanks, is a leading manufacturer of quality polymer rainwater tanks and farm products, designed and built to last in tough Australian conditions. As an Australian owned and operated company, Clark Tanks is committed to providing quality products designed to meet the needs of rural and residential Australia.

Industrial

Clark Industrial supplies industrial tanks to all major companies that design and construct effluent treatment plants across Australia. Our tanks are fabricated from first grade polyethylene LLDPPE, and cover a range of specific gravities (SG 1 – SG 1.5 – SG 2) to accommodate the great diversity of products that need to be stored on site.

At Clark Industrial, we understand the requirements for such large projects and our experience in fabrication and working to customer specifications has earned us a reputation for quality workmanship and professionalism.

“I think that Clark Industrial Tanks have done a terrific job for us at our Spring Gully Project. Prior to this project, we had been conducting the majority of our business with another tank fabricator who we were having many problems with. Spring Gully was the first of the projects that we have worked together on; from our end it has been a success and we hope to continue the established relationship on future projects.”

Water treatment plants across Australia form an important part of Clark Industrial's business. We supply all the major companies that specialise in water treatment plants. Clark Industrial has a wealth of knowledge in the fabrication of industrial tanks for treatment plants. Our people understand the demands on companies to complete large projects within certain time frames and to the highest standards.

At Clark Industrial, we pride ourselves on our quality workmanship and have invested in highly skilled tradespeople to perform all our industrial tank fabrication. Clark Industrial provides excellent service, maintaining open communication with you to ensure that all our tanks arrive on time and are fabricated to your exact specifications.

"Aeropack have been building a new manufacturing facility. Like any major project, timing and quality is crucial. The delivery of the polyethylene chemical storage tanks was critical for us to achieve other milestones. We received the tanks from Clark Industrial ahead of schedule fully fitted out, ready to go. All the requirements of our designs were fully met. Certainly, a high quality product and service."

David Beech

Engineering Manager - Aeropack Australia Pty Ltd

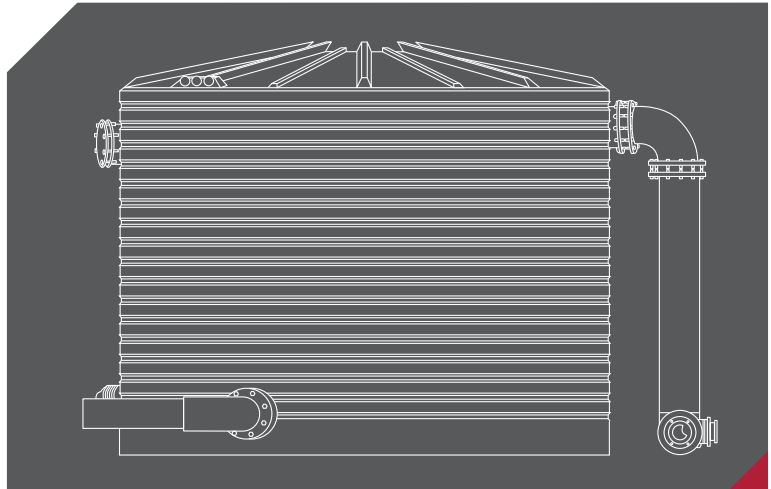

Water treatment plant, South Australia

Clark Industrial has the capability to service the heavy end of the mining industry. Our team has gained a thorough understanding of the industry requirements and has supplied industrial tanks to the mining sector for its every need, from chemical dosing tanks to the large 46,800-litre industrial storage tanks. We are also renowned for our expertise in fabricating large industrial flanges and other fittings for the industrial tanks required for special mining applications.

The largest mining companies across Australia have experienced the service and professionalism of Clark Industrial and have come to rely on our products and workmanship. What's more, our service to the mining industry is backed by the broad range of our manufacturing and distribution network, spanning from Far North Queensland to New South Wales, Victoria and into South Australia.

Clark Industrial has a product that no one else can match – the 30 m³ Conical Bottom Storage Tank. Together with the smaller sizes we offer, these tanks are the most flexible industrial storage vessels on the market.

The conical bottom storage tank range is unique in its versatility to suit a vast range of industrial applications. The tanks are manufactured to handle specific gravities of SG 1 up to SG 1.5 and can be fitted out to your specifications by our team of expert tradespeople. The 30 m³ tank features a hot dip galvanised stand.

Clark Industrial supplies industrial conical bottom tanks for water treatment plants, settling tanks, liquid fertiliser storage and molasses storage, to name a few applications ideal for these tanks. The industrial conical bottom tank range is fast becoming a leading choice in industrial storage.

Available from Dalby plant only.

Clark Industrial offers an extensive range of chemical storage tanks, with capacities from 500 L to 46,800 L. Manufactured to specific gravities of SG 1.5 up to SG 2, our chemical storage tanks are suitable for storing most DG products, as well as non-DG liquids.

Clark Industrial has the expertise to manufacture and fit out chemical storage tanks to your exact specifications. We understand the special requirements of the industry and offer a comprehensive range of suitable fittings, including extension flanges, backing plates, full face flanges, BSP threaded fittings, sight glasses and float level assemblies.

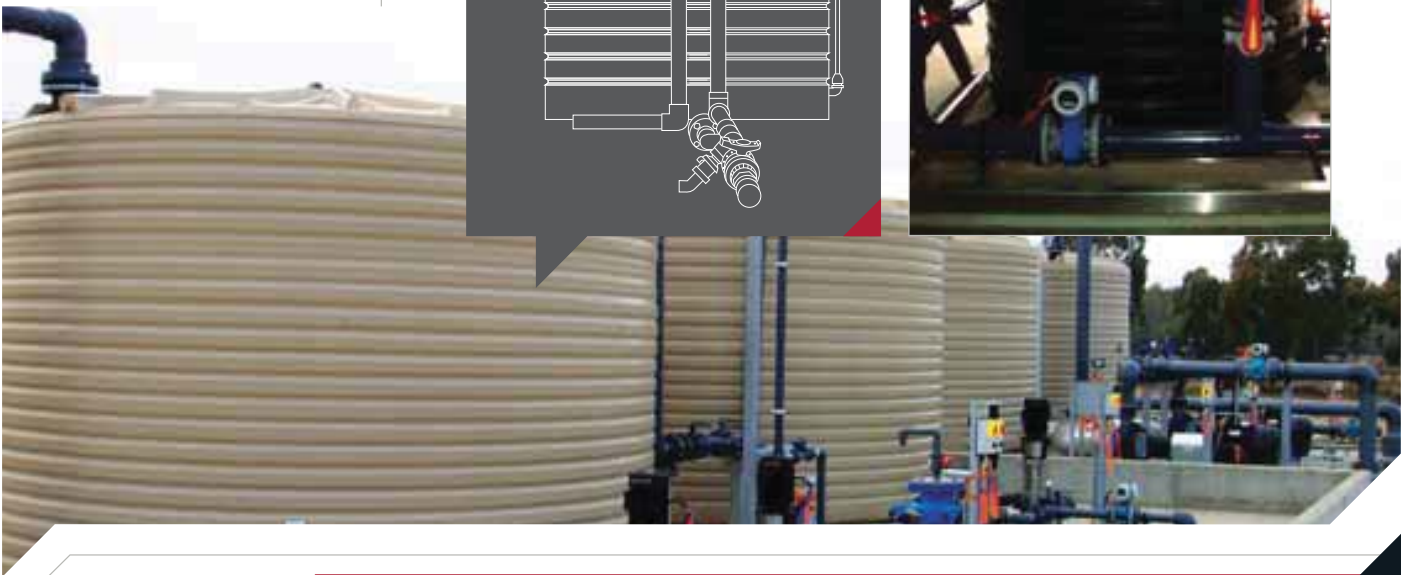

Delivered complete with documentation that your tank has been made precisely to your specifications, Clark Industrial tanks offer a reliable, quality system for the safe storage of DG and non-DG liquids.

“As a chemicals manufacturing company, Omega Chemicals has on many occasions over the years required the use of a range of industrial polyethylene storage tanks for a wide variety of uses from storage of chemicals to the mixing of blended products. Clark Industrial has offered the service and quality that befits our quality assured company requirements, at a competitive price. Access to after sales service and support has been a standout aspect of the way that Clark Industrial Tanks have conducted themselves in the marketplace. I have absolutely no reservations in recommending both the product and service offered by Clark Industrial.”

Liquid Feed

Clark Industrial is the major supplier of industrial polyethylene tanks for the storage of molasses and other liquid feed products. Having manufactured industrial grade tanks for the agricultural sector for more than a decade, we have a proven track record for quality and workmanship. We specialise in custom-fitted industrial tanks to suit specific applications and on-farm usage. As a strategic partner with national corporations that supply molasses to the marketplace, we are dedicated to providing quality industrial tanks and a professional service.

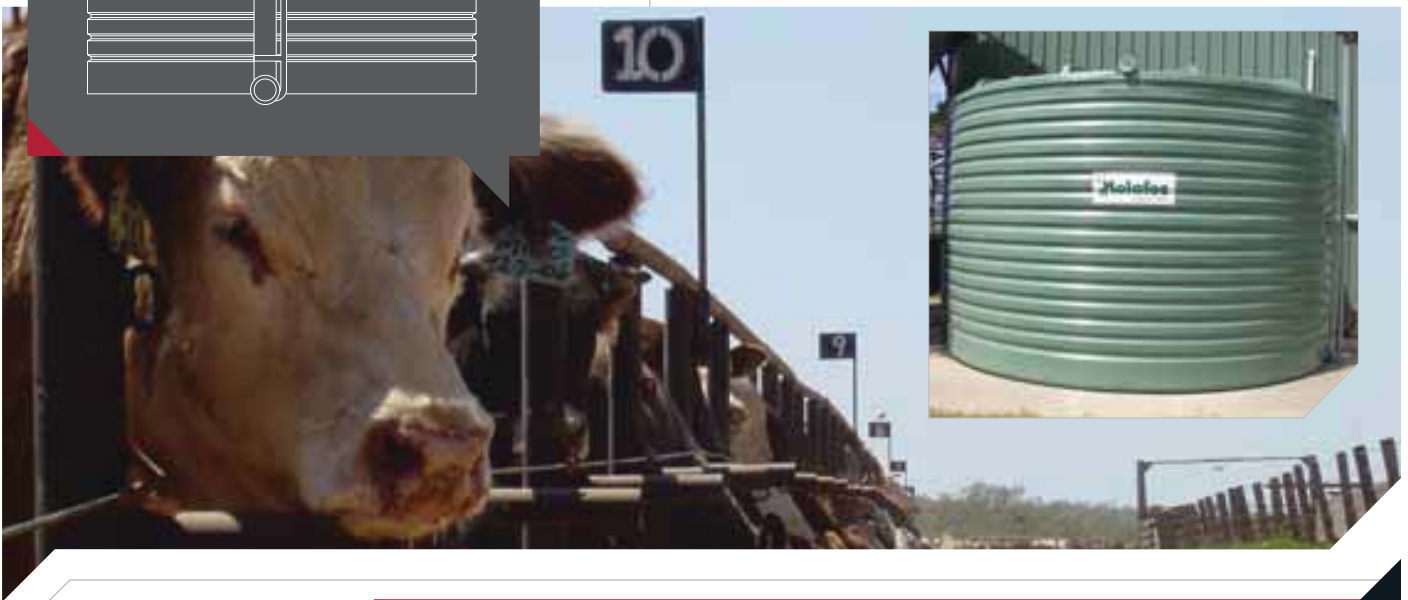

“Champion Liquid Feeds is a leading supplier of proven liquid feed supplements for livestock, coupled with expert technical support for our customers. As such, we are delighted to endorse Clark Industrial Tanks, and in particular its production, sales and admin team. The Clark Industrial team is a key partner with us in maintaining our leadership position in the liquid feed market. To exceed our customers’ expectations, it is imperative that we are able to source superior quality liquid storage vessels that meet our demanding requirements, often with compressed lead times. Clark Industrial and its team have filled our needs with professional ease over many years and have set new benchmarks for supplier responsiveness and product quality. The wide and comprehensive range of Clark Industrial is matched only by its impressive technical ability to customise fittings and accessories. They are most definitely one of our key strategic partners.”

Liquid Fertiliser

Clark Industrial is a leading provider of liquid fertiliser storage. Suitable for either industrial or on-farm storage, our extensive range of fertiliser storage tanks has the capability to hold liquid fertilisers with a specific gravity of SG 1.5 or SG 2. At Clark Industrial, we take pride in the reputation we have established in this field and plan to maintain it by continuing to provide an outstanding product and excellent customer service. Over the years, we have built close relationships with some of Australia's largest suppliers of fertilisers. As a result, Clark Industrial has been able to work with these companies to custom-engineer their fertiliser storage tanks for optimum performance.

"Incitec Pivot is the leading supplier of liquid fertilisers in eastern Australia. Our Easy Liquid Fertiliser range offers growers many advantages over their traditional practices. Easy Liquid Fertilisers are very easy to use, flexible in application and well suited to precision agriculture and fertigation. It is critical that the liquid fertiliser tanks we recommend are "fit for purpose" and delivered on time. Clark Industrial has worked with us over the years to develop a custom-designed Easy N Tank that is ideally suited to the needs of our customers and our tanker drivers. Rigorous quality control, efficient customer service and speed of delivery are key features that we value from our partner in Clark Industrial Tanks."
